Subject: MWM Visitation Feedback

Greetings Sir,

It was refreshing to see that your students were very engaged in the review session that took place upon entering the class. As you and the student teacher facilitated the review session, you all exhibited some high quality teaching techniques. Your student teacher called on students by name. It was clear that she had a command of the room and was clearly comfortable sharing the spotlight and being in charge. Very impressive! She was very strategic in the manner in which she re-assigned seats in preparation for the quiz.

I have a couple of questions regarding the Rigor and Alignment Portion of the MWM protocol: As I reviewed the quiz that the students took, it did not appear to be rigorous. Please review the questions on the quiz so that we can compare notes and check for alignment.

Please see me if you have any questions.
